1.3 Operator Certification

The Safe Drinking Water Act requires states to adopt and implement a program for certification and recertification of the operators of community water systems (CWSs) and non-transient, non-community water systems (NTNCWSs) that meet the minimum standards set forth in guidelines to be published by EPA.

ADEQ will conduct certification exams or contract with third party to conduct exams statewide, maintain registry of certified operators, and process and resolve disputes between persons and third party testers. ADEQ will continue outreach on the proposed operator certification fee rule as needed.

1.4 New and Existing System Capacity Development

Ensure that new community water systems and non-transient, non-community water systems which commenced operations since October 1, 1999, can demonstrate technical, managerial and financial capacity to operate in compliance with the requirements contained in the federal regulations in effect at the time the water system begins operations.

Continue WIFA/DEQ Partnership providing operational technical assistance and tools to public water systems to assist in improving system compliance. Identify technical, managerial and financial (TMF) obstacles/challenges faced by existing systems and implement strategies to address.

1.4

1.7 Source Water Protection

Identify protective strategies and assist individual public water systems with the planning, development and application of measures/actions necessary to implement the Source Water Protection Program. Targets are our goals; however, the actual numbers achieved rely on the willingness and ability of public water systems to participate in the voluntary source water protection program (SWPP).

- a) Source Water Protection – provide technical assistance in planning and implementing local Source Water Protection for public water systems throughout Arizona.
- b) Source Water Assessments – perform or assist in the development of assessments for new individual sources or new systems which voluntarily choose to participate in source water protection by delineating source water protection areas, inventorying potential sources of contamination and performing vulnerability/susceptibility analysis.
- c) GUDI/Suspect GUDI Evaluations/Hydrology reviews – Make sensitivity determinations for PWSs/sources through reviews of occurrence data, sanitary surveys, and hydrological characterizations.

1.7

1	Conduct Source Water Protection Program outreach events with individual PWSs.	6/30/2018	22	Drinking Water	DWSRF 15%
2	Delineate source water assessment areas for new PWSs/sources or reassess/update existing assessment areas. A)Collect locational data using GPS and/or GIS for new drinking water sources or modify/update locational information for existing sources.				DWSRF 15%
a	Collect locational data using GPS and/or GIS for new drinking water sources or modify/update locational information for existing sources.	6/30/2018	4	Drinking Water	
3	Conduct comprehensive inventories of potential sources of contamination.	6/30/2018	6	Drinking Water	DWSRF 15%
a	Collect locational data using GPS and/or GIS for potential sources of contamination (chemical use/storage) within ½ mile radius of a new or existing drinking water source.	6/30/2018	4	Drinking Water	
b	Identify any changes in trends to the previously identified, most prevalent, and most threatening potential sources of contamination.	6/30/2018		Drinking Water

Agua Caliente Individual permit was terminated - The COE determined Agua Caliente Lake not to be a WOTUS.
 Show Low Individual permit was terminated - The Army COE determined the Show Low lakes not to be a WOTUS.
 For individual permits - the average number of days to grant permit was 230 days. The permits unit also issued 3
 backlogged permits that were on average 1200 days backlogged.
 The Resolution Copper Mine individual AZPDES permit was appealed and the hearing took place in FY18. As of the end of
 the FY no decision has been made by the Administrative Law Judge. The appellants are Arizona Mining Reform Coalition
 and the San Carlos Apache Tribe. The appellants are have sued citing the mine should be considered a new sources and
 thus should not be allowed to discharge any copper into Queen Creek, which is impaired for copper. ADEQ has
 maintained the mine is an existing source.

Mid year -

In the FY 17-18 funding cycle, 604b funds were awarded to three water quality projects; specifically with a stormwater focus in Maricopa and Pima Counties. They are as follows: to produce a multi-city guidance guide on LID and stormwater projects in Maricopa County, to the City of Goodyear to address illicit discharges to the stormwater system and a Pima Association of Government's stormwater project on the impaired section of the Santa Cruz River in Pima County. The projects are in implementation with the first project reports submitted for the first phase of the individual grants.

End of Year

Central Association of Governments (CAG) has been the lead area for growth with four amendments. None as yet have been approved, but are in various phases of approval. Pima County (PAG) has made great strides on their 208 Plan update, more streamlining of approval processes, GIS mapping and information accessible on the PAG website for consultants and the public in general.

Several WQMWWG meetings have been held this year to discuss on-going projects in the respective areas; if any. A primary topic of discussion at the meetings has been the contract level of funding in FY20 and the possibility of a total competitive grant process.

Three 604(b) grants were awarded to the following: City of Scottsdale, to Pima Association of Governments (PAG) and the City of Goodyear. Scottsdale prepared a guidance manual focused on stormwater management with green infrastructure, LID types and other approaches. PAG focused the first phase of a stormwater program on the Canada del Oro Wash area, an impaired section of the Santa Cruz River. The City of Goodyear, although the project was uncompleted, began a process to coordinate across departments to work on prevention of illicit discharges and stormwater management for compliance with the MS4 permit.

FY18 DPA contracts were concluded with barely a few dollars in remainder from all expenditures.

ADEQ has fallen behind on some of the current TMDLs. The Upper Santa Cruz Clean Water Plan (CWP) should be finalized by the end of December 2018. EPA has reviewed informally and ADEQ is prepared to move on to the next steps of public meetings/public comment. Queen Creek TMDL had some questions about the validity of the model used, and at this time ADEQ does not have the funding to re-run the model at this time. Pinto Creek TMDL is fairly low priority for ADEQ but will be completed in FY19. The Arizona Water Watch (AWW) Citizen Science program has been wildly successful with presentations at multiple conferences

3.9 NPS Project Implementation, Effectiveness Monitoring/Evaluation, and Reporting

Implement watershed planning documents and other projects to protect and restore surface water quality. Conduct effectiveness monitoring and evaluations to track resulting water quality improvements. Report on NPS program progress and successes. Closing out Hillside Mine NPS grants, reducing ULO from 56% to 35% from last year to this year.

Overall, ADEQ is on track with NPS project management and soliciting and awarding grant projects. FY18 was the first year that the Watershed Preservation Grants (WPG) were included in a grant cycle (GC 20) and we awarded 3 WPGs. BMP evaluations continued in FY18, but the approach will change in FY19 as ADEQ moves toward the targeted watershed approach. This approach will target 3 priority areas (Verde River-Oak Creek, Bradshaws, and Upper San Pedro River) with intense resource and time investment to identify, fund/facilitate, track projects and improvements to ultimately reach delists of waterbodies.

4.1 Drinking Water Compliance and Enforcement

Conduct compliance inspections of drinking water systems. Investigate and resolve complaints relating to regulated facilities. Respond to drinking water emergencies. Populate SDWIS sanitary survey fields.

Evaluate, prepare and take informal and formal enforcement actions for violations of state drinking water program statutes and rules and for violations of delegated federal SDWA statutes and rules. Utilize community liaisons to track progress towards meeting compliance schedules. Submit the updated Enforcement Protocol Response (ERP) report within 3 weeks of receipt. Transmit the inspection report to the Drinking Water Monitoring Unit for SDWIS data entry.

4.1

1 Report the number of Drinking water sanitary surveys conducted, prioritized by date of last survey.					DWSRF 15%, DWSRF 10%

4.3 Surface Water Compliance and Enforcement

Conduct site inspections of AZPDES regulated facilities. AZPDES inspection reports will encompass applicable activities as described in the NPDES Compliance Inspection Manual (EPA 305-x-04-001, July 2004). Provide electronic PDF copies of all completed major and minor inspection reports within 30 days of issuance to R9NPDES@epa.gov, including the facility name and permit number in the email subject line.

Pretreatment audits and inspections shall be performed in accordance with "Pretreatment Compliance Inspection and Audit Manual for Approval Authorities" (EPA 833/B-86-100, July 1986). Provide electronic PDF copies of the compliance inspection and audit reports within 30 days of issuance to the EPA Region 9 Pretreatment Coordinator and to R9NPDES@epa.gov, including the facility name and permit number in the email subject line.

Review each AZPDES permit application from publicly owned treatment works (POTW) without a pretreatment program to determine whether any significant industrial users (SIU) are discharging to the POTW. If so, require the POTW to develop a pretreatment program (full or SIU oversight only) in the subsequent permit or alternatively add the SIUs to the State's SIU inventory.

Review and approve new programs (full or SIU-oversight only) and changes to approved pretreatment programs submitted by POTWs. Provide written analyses to the POTWs when such submittals are unprovable.

Evaluate, prepare, and take informal and formal enforcement actions for violations of water quality statutes, rules and permit conditions and federal CWA statutes, rules and permit conditions. Utilize community liaisons to track progress towards meeting compliance schedules. Provide electronic PDF copies of all formal and judicial enforcement actions when issued to R9NPDES@epa.gov, including the facility name and permit number in the email subject line.

Manage the Arizona data in the ICIS-NPDES data system according to EPA data policies[1] and EPA's NPDES electronic reporting rule. This includes data collection, data entry to ICIS-NPDES of required data elements, and reporting. Data sources can include dischargers, state databases, and contractors. Electronic reporting rule requirements for storm water data shall be entered in compliance with the PPG grant condition. Arizona will ensure that data and reporting requirements as outlined in their State Implementation Plan (SIP) to meet Phase 2 requirements of EPA's NPDES electronic reporting rule is completed on schedule and inform EPA in a reasonable time frame if projected tasks cannot be met.

4.3

1 Conduct the targeted number of AZPDES point source inspections:				PPG
a	Perform scheduled compliance inspections of all major facilities that are operational every other year.	24	24	Surface Water
b	Perform scheduled compliance inspections of AZPDES minor point source facilities at least once in permit term.	6	8	Surface Water

4.3 Surface Water Compliance and Enforcement

Continued

4.3

- 12 Hold meetings and/or conference calls with EPA to discuss timely and appropriate CWA enforcement. (*) Document agreement on discussed items on follow up actions. One call each quarter will be devoted to discussing the QNCR/QNVR list and the details of actions taken on each SNC on the QNCR list.

Notes:

EPA's policy defines "timely" enforcement as formal enforcement taken against a facility in significant non-compliance ("SNC") within 5 ½ months of the end of the quarter in which the facility first appears as SNC on a Quarterly Non-Compliance Report ("QNCR"). Formal enforcement is defined by EPA as an administrative order or civil action that requires the facility to return to compliance. EPA will consider taking formal enforcement action against SNC facilities if ADEQ does not issue a timely formal enforcement action.

PPG	1.95	105,567	46,450	47,231	199,248
	13.53	518,310	228,057	231,892	978,259

The surface water protection section overall compliance rate for announced inspections was 75%.

The average # of days to return a facility back into compliance was 84 days.

For individual permits, ADEQ has completed 87 file review inspections of which 38 led to an enforcement action.

ADEQ also contracted with PG environmental to perform 10 quality assurance inspections at individually permitted AZPDES facilities. The QA/QC inspection were targeted inspections on the facilities sampling and reporting procedures.

PG identified several deficiencies in the facilities SOPs and sampling protocols. ADEQ will be making improvements to the pre-inspection and inspection checklist to make sure facilities are maintaining compliance with all aspects of quality assurance.

5.3 Water Quality Data Management

Facilitate the development and management of relevant database applications. Facilitate the development of new and expansion of existing e-government applications. Facilitate water data capture, storage, access, retrievals, analysis, integration, and sharing.

All water quality data generated in accordance with an EPA approved Quality Assurance Project Plan will be transmitted into the Agency's Storage and Retrieval (STORET) data warehouse using either the Water Quality Exchange (WQX) or WQXweb. Water quality data that are appropriate for STORET include physical, chemical, and biological sample results for water, sediment and fish tissue. The data include toxicity data, microbiological data, and the metrics and indices generated from biological and habitat data. WQX is the water data schema associated with the EPA, State and Tribal Exchange Network. More information about WQX, WQXweb, and the STORET warehouse, including tutorials, can be found at <http://www.epa.gov/storet/wqx/>

5.4 WIFA Support

Provide water and wastewater engineering assistance to WIFA. Pursuant to 2014 amendments to the Clean Water Act, assist WIFA's review of applicants' Cost and Effectiveness Analyses and Fiscal Sustainability Plans. Cost and Effectiveness Analyses include an evaluation of the cost and effectiveness of the Processes, materials, techniques and technologies of the projects. Fiscal Sustainability Plans include an inventory of critical assets, evaluation of asset performance, and a plan for repair and replacement. Initial implementation will be wastewater projects in the first year, but may increase and include drinking water projects over time. Also assist WIFA project managers with the American Iron and Steel requirements.

5.4

1 Provide engineering consultation to WIFA project managers during loan application process:

a	Review WIFA project manager's due diligence report for evaluation of project purpose, scope and cost.	As needed	Water Permits Drinking Water
b	Accompany WIFA project managers on loan application visits when needed to assist with evaluation of technical aspects of project.	As needed	Water Permits Drinking Water
c	Assist with WIFA review of applicants' Cost and Effectiveness Analyses and Fiscal Sustainability Plans.	2-4 wastewater projects	Water Permits Drinking Water

2 Accompany WIFA project managers on construction observations when needed to assist with review of American Iron and Steel compliance.

As needed
Water Permits
Drinking Water

3 Answer questions/provide engineering consultation to WIFA project managers as technical questions arise.

5.5 Border Strategy

Continue implementation of the Border Strategy Plan by identifying water quality transboundary issues, coordinating with U.S. and Mexican counterparts toward the resolution of respective issues, and conducting water quality studies in the Arizona border region.

Coordinate with EPA on Border 2020, or subsequent U.S.-Mexico border environmental program activities, and provide technical support as feasible on projects funded through the program.

5.5

1 Continue support of the wastewater pretreatment program in the Ambos Nogales border region.
Specific activities include:

a	Provide technical support to stakeholders Strategy 3.c.i	6/30/2018	Complete	SRO
b	Maintain or revise, if necessary, ADEQ's current Memorandum of Understanding with Nogales, Sonora authorities	6/30/2018	Complete	SRO
c	Assist with coordination of training to enhance local pretreatment efforts	6/30/2018	Complete	SRO
d	Assist with source characterization of regulated contaminants	6/30/2018	Complete	SRO

2 Participate in or chair meetings with binational stakeholders regarding issues and remedies to the water quality impairment of shared watersheds along the US/Mexico border including Nogales Wash in Ambos Nogales
Strategy 3.c.i

6/30/2018 Complete SRO
